SMARTWATT ENERGY SERVICES, INC. OPENS NEW OFFICES IN WESTCHESTER COUNTY

Engineering Energy, Economics and Environment

Clifton Park, 1/8/08 – SmartWatt Energy Services, Inc. announces the opening of new offices in Westchester County, New York. With corporate offices in Clifton Park, New York, and a regional office in Rochester, New York, SmartWatt is confident that this additional location will help the company to better serve its clients in the New York Metro and Tri-State areas.

SmartWatt had been successfully operating out of a temporary office located in Somers, New York, since October 2007. Because of its immediate success within the region and the presence of additional demand, the decision was made to move to larger, more permanent accommodations, and SmartWatt negotiated a lease for office space at 500 Mamaroneck Ave. in Harrison, New York.

According to Chris Covell, CEO of SmartWatt, the volume of work generated and the many other local energy-saving opportunities in this area were determining factors supporting the move.

Peter DeMartis will head the new Westchester office as General Manager. Peter joined the SmartWatt team in September of 2007 and comes to the company with over 20 years of experience in the project management/project development field, successfully managing and implementing projects from design through installation and budgeting. His keen attention to detail and a “customer first” attitude have lead to countless referrals and accolades for the responsiveness of his team and the timely delivery of completed projects.

In addition to Peter, the new office will be staffed initially with a Project Design Engineer and a Project Manager; additional personnel will be hired as the demand and market share increase.

SmartWatt is excited about upcoming opportunities resulting from this move and looks forward to serving its clients in the New York Metro and Tri-State areas with the same degree of professionalism and customer satisfaction it now provides at its other locations.

SmartWatt Energy Services, with headquarters at 12 Corporate Drive in Clifton Park, NY, is a turnkey energy services company dedicated to reducing facility operating costs through demand-side energy solutions while creating a legacy of environmental responsibility. SmartWatt utilizes an integrated approach offering lighting energy services, comprehensive energy services and consulting energy services.
